

EMPLOYMENT OPPORTUNITY: CARBON MARKET ANALYST

ÉcoRessources Consultants is a consultancy firm specialized in environmental and natural resources economics. Our main services on climate change and the carbon market are:

- Emission Reduction Projects Origination;
- Transaction and Market Services;
- Climate Change Policy and Emission Trading Analysis;
- Decision aid for adaptation.

ÉcoRessources is looking for a technical expert with in-depth knowledge of emissions trading systems and offset project development to join our Climate Change Division. The Analyst will primarily assist in identifying sectors and project with significant GHG abatement potential and provide technical expertise to develop GHG emission reduction projects – both CDM and North American offset projects. Additionally, the selected candidate will be required to assist the team in business development activities in North America, Latin America and possibly in Africa and Asia.

Main Tasks and Responsibilities

- Compilation of data, calculations and preparation of Project Idea Notes (PINs) and Project Design Documents (PDDs);
- Baseline and additionality analysis;
- Development of new baseline and monitoring methodologies;
- Sustaining and developing business relationships with partners and clients;
- Project management.

Minimum Requirements

- Graduate degree in science, engineering, applied environmental science or related discipline;
- Proven technical expertise for calculating GHG emissions/reductions;
- Good understanding of the carbon market and emission reduction project development;
- More than 3 years of relevant professional experience;
- Experience in carbon or energy management, emissions reduction projects or offset/CDM project origination;
- Excellent English written and oral communication skills;
- Strong client relationship building skills.

Desirable Aptitudes and Qualifications

- Self-starter with the ability to work independently;
- Ability to work with a multidisciplinary team operating from different locations;
- Attention to details and a proven commitment to excellence and quality control;
- Flexibility to adapt work schedule and to travel occasionally;
- Strong computer skills;
- Experience in preparing PINs and PDDs is a definite advantage;
- Knowledge of CDM baseline and monitoring methodologies is an advantage;
- Working knowledge of French is highly desirable. Knowledge of Spanish or Portuguese is an advantage.

Our offer

We offer a stimulating work environment as well as a flexible work schedule and four weeks paid holiday. Compensation is competitive and will be commensurate with experience and responsibilities.

We expect the selected candidate to start as soon as possible and to be working out of either the Québec City or Montréal office.

Deadline for application: September 3rd, 2008.

Interviews will be conducted in Montreal during the week of September 8th, 2008. Interested candidates must submit a comprehensive CV along with a one-page letter of intent to:

**Carole Quashie
ÉcoRessources Consultants
825, rue Raoul-Jobin
Québec (Québec), G1N 1S6**

**Fax: 1 418 877-6763
Email: carole.quashie@ecoressources.com**

While we appreciate considering all applications, only candidates selected for an interview will be contacted.
